

Lasting Solutions for Challenging Conditions

## Corrosion Resistant, High Strength, Lightweight FRP

### XL3 & XL6 FRP Tank Covers

- Long clear span capability
- Gasketed for odor & vapor control
- Removable, walkable panels
- Access hatches and vents
- FRP structural components

### AQUASPAN FRP Baffle Walls

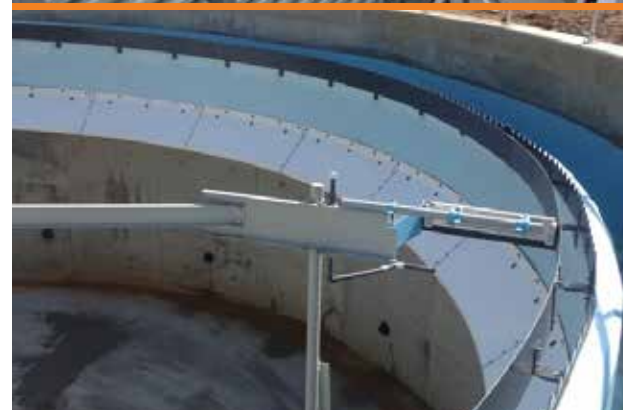

- Slide Guide or bolted
- Solid or perforated
- 1/4" and 1/8" thick panel options
- Access and FRP column options

### FRP Clarifier Products

- Weirs & Scum Baffles
- Density Current Baffles
- Launder Troughs
- Launder Covers

### TUFF SPAN™ FRP Building Structures

- Desalination buildings
- Process enclosures
- Translucent panels for sludge drying beds
- Walk-in basin covers

Your Resource for Fiber Reinforced Polymer Solutions

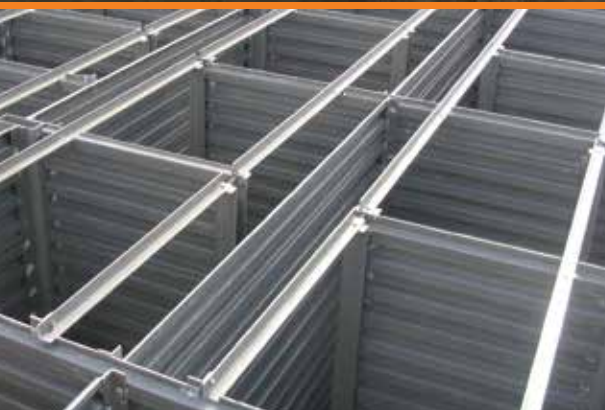

## Corrosion Resistant, High Strength, Lightweight FRP

### FRP Tank Covers & Structures

Designed specifically for water and wastewater treatment operations, XL3 and XL6 systems are the most advanced covers available for service life, process accessibility, odor and vapor control.

For walk-in access or as a weather barrier, Tuff Span Building Structures offer a cost effective, corrosion resistant, structural enclosure.

### FRP Baffle Walls

With superior combination of strength and corrosion resistance, baffle wall systems from Enduro Composites deliver design flexibility and industry-leading performance.

Composed of fiberglass reinforced plastic baffle panels, angles and framing members, our FRP structural baffle and partition wall systems are specifically designed for water and wastewater treatment flow control.

### FRP Clarifier Products

Our complete line of weirs, scum and density current baffles plus launder troughs and covers offer a lasting solution and industry leading quality for treatment operations.

From Enduro Composites, clients receive the value of single source accountability for design, manufacturing, fabrication, and quality control under one roof.
